«НАЦИОНАЛЬНЫЙ ИССЛЕДОВАТЕЛЬСКИЙ УНИВЕРСИТЕТ ИТМО»

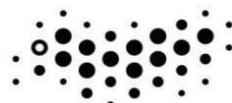

Отчет

по практической работе № 3 «CSS-переменные, темизация сайта средствами CSS»
по дисциплине «Фронтенд-разработка»

Выполнил: Власов М. И.

Группа: К33402

Проверил: Добряков Д. И.

УНИВЕРСИТЕТ ИТМО

Санкт-Петербург, 2021

Задача

Выполнить темизацию ранее реализованного сайта.

Ход работы

Главная страница в светлой теме выглядит следующим образом:

The screenshot shows the homepage of the 'Home4Night' website. At the top, there is a navigation bar with links for 'Home4Night', 'Home', a search icon, and user account links 'Log in' and 'Sign up'. The main title 'Find Home for One Night' is prominently displayed in a large, dark font. Below the title is a subtitle: 'If you are going to travel and looking for a place to stay in, we can help you. There are a lot of houses, flats and rooms available for the rent. You'll easily find the one you like for a low price.' A blue 'Explore »' button is located below the subtitle. The bottom section features three images of different types of vacation rentals: a wooden cabin in a forest, a modern houseboat on water, and another wooden cabin with a unique gabled roof.

Если переключиться на тёмную тему, увидим такой вариант оформления:

The screenshot shows the same homepage from the previous image, but with a dark red header and footer. The main title 'Find Home for One Night' remains the same. The subtitle and 'Explore »' button are identical to the light mode version. The bottom section with the three images of vacation rentals is also present, maintaining the visual style of the light mode version.

Посмотрим на страницу поиска в светлой теме:
