The screenshot shows the homepage of the Axolotl website. At the top, there are two small cartoon axolotls. The main title "axolotl" is displayed prominently in the center. Below the title are two buttons: "register" and "sign in". In the top right corner, there are links for "axolotl" and "axolotl & jabka". The background features a large, vibrant image of an axolotl with pink gills and a white body. A dark banner at the bottom contains text about the axolotl's regeneration ability and a "read more" button. The footer section includes a "read more" button, a "song" section with lyrics, and a video thumbnail of an axolotl playing a keyboard.

The Ambystoma mexicanum, commonly known as the axolotl has the impressive ability to regenerate multiple body parts. However the molecular mechanisms underlying regeneration remain poorly understood at the molecular level. Here we describe a method creating a spinal cord injury in the axolotl and for manipulating microRNAs *in vivo* in the axolotl spinal cord. This

is more common in axolotls than some other creatures and melanoid.

position. Actually you may even be able to tell its origin by the color and pattern of the background and spots.

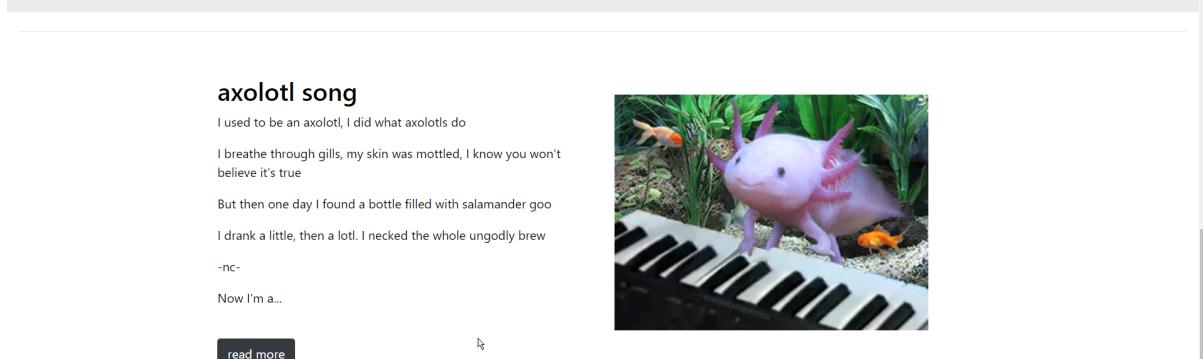

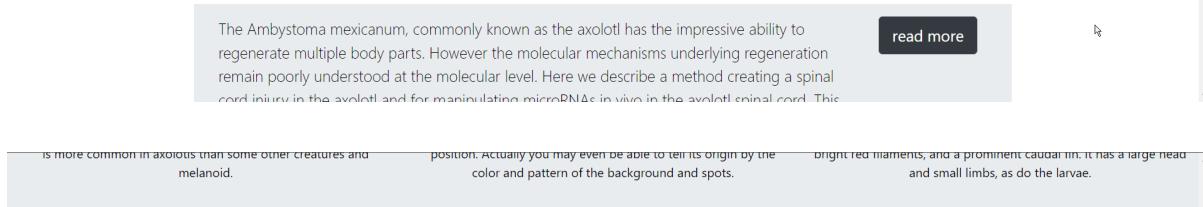

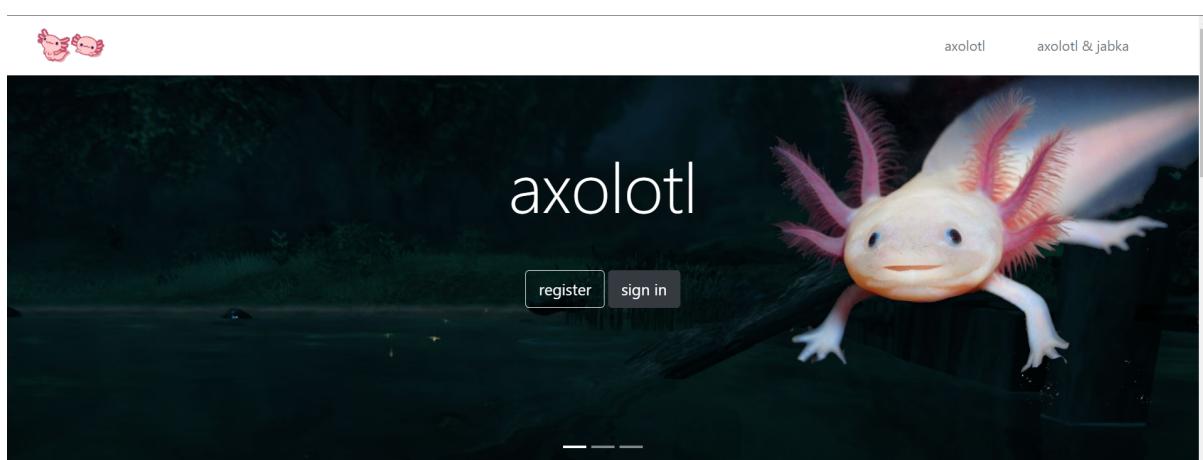

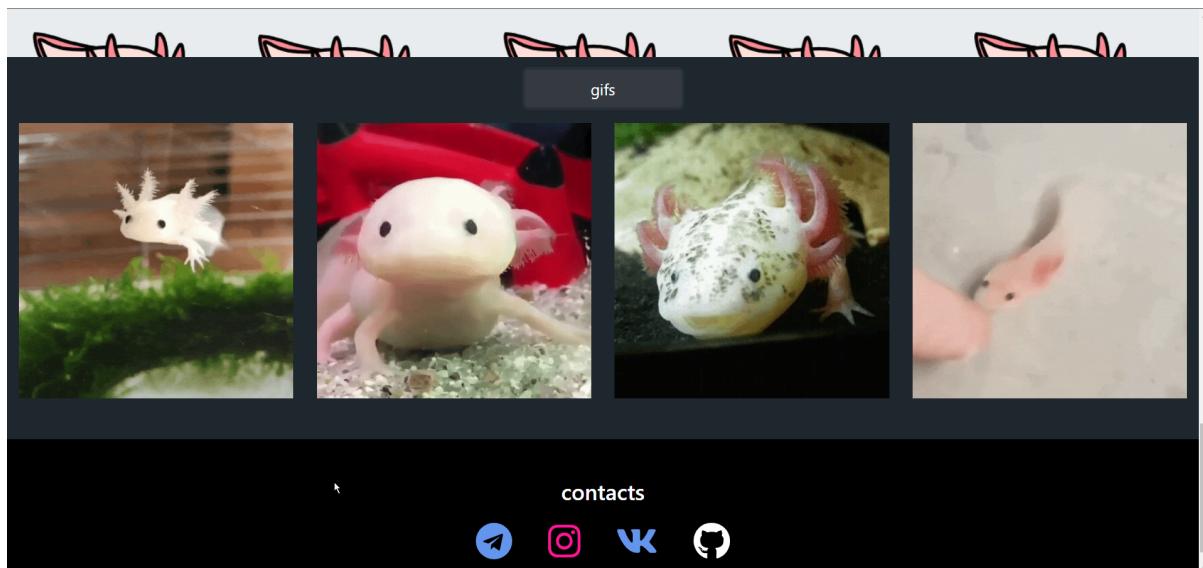

bright red filaments, and a prominent caudal fin. It has a large head and small limbs, as do the larvae.

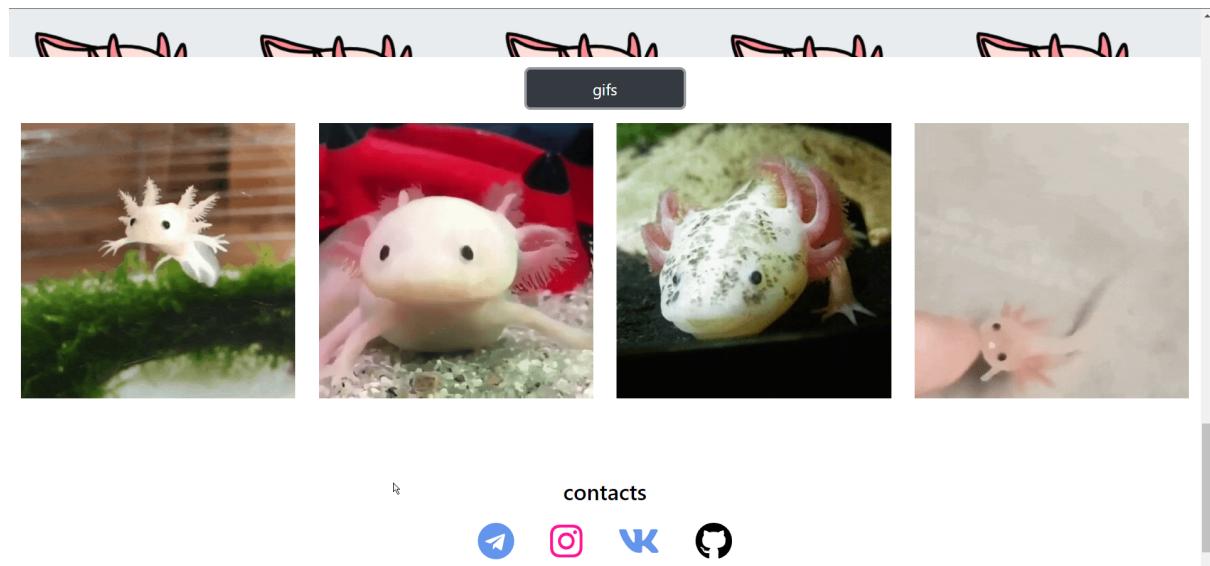

axolotl song

I used to be an axolotl, I did what axolotls do
I breathe through gills, my skin was mottled, I know you won't believe it's true
But then one day I found a bottle filled with salamander goo
I drank a little, then a lot. I necked the whole ungodly brew
-nc-
Now I'm a...
